

No excuse for genocide

Genocide as “self-defense” - Western media as accomplices to the genocide in Gaza - We stand up!

The current genocide is the culmination of a spiral of violence that has been going on since 1948 and has been covered up by the powerful in the West for generations. The media portray the genocide as self-defense - but they are nothing less than partners in crime.

Introduction

This article deals with a more than unsavory topic: a genocide that is committed in the open and not only promoted by most Western media, but justified in such a way that opponents of this genocide - be they Jews or non-Jews - are attacked, vilified and threatened in the most disgraceful manner.

It is not only difficult, but downright dangerous to stand up to such a superior force. Nevertheless, we have decided to stand up. Imagine how you would like to answer the question of your grandchild sitting on your lap in 20 years' time and asking, *"Grandpa, what did you think about the time when babies were slaughtered in plain sight? - Why did everyone keep quiet? - Did you keep quiet too?"*

It all began with a mendacious fairy tale

I was born in Zurich in 1964 and since my earliest childhood the following axiom has applied: *"The Israelis are the good guys and the Palestinians are terrorists"*. This was instilled in us by our parents and teachers and we saw ourselves happily confirmed when we were allowed on television to watch our Israeli heroes defeating the evil Arabs in all the wars. Good prevailed, we were on the right side of history and sang Hebrew songs in religious education lessons at a Protestant grammar school.

**"The Israelis are the good guys and the Palestinians
are terrorists"**

I was completely unaware that this view of things had nothing to do with reality. My friends and acquaintances felt the same way - for decades.

Skepticism - the stuff realities are made of

When I traveled to Moscow for the first time in 1997, I was confronted with a character trait of Russians that is completely foreign to Westerners: skepticism. Russians have the characteristic - or rather: the ability - to take note of everything they are given in terms of information - be it by the media or the government - and instead of believing everything, they question everything.

The discovery of skepticism shaped me and had a lasting impact on my thinking. Admittedly, questioning is much more strenuous than believing and since most people believe almost everything they are told by parents, teachers, pastors, politicians and the media, skeptics in the West find themselves in an almost fatal minority. What's more, politicians and the media add a “democratic touch” to the discussion. They insinuate that the majority view is the right one. This is complete and utter nonsense, but many even believe in this fairy tale.

In the last 30 years or so, I have had a lot of catching up to do. The internet helped me to do this, as it opens up sources that take control of the narrative away from those in power, although you have to be careful, as the internet is also full of lies. However, if you apply skepticism, the Internet opens up a universe where you can gather the facts.

October 7, 2023 - The Trigger for the “Final Solution”

The Bloodbaths Series

When Hamas attacked on October 7, 2023, and within hours there were reports of babies being beheaded and mass rapes committed by these monsters, we decided to wait: We are not a news outlet. We took this event as an opportunity to write a series about bloodbaths.

“The powerful of this world are capable of using any means to achieve their goals - any!”

Our aim was to show that bloodbaths - often caused by the “victims” themselves - are regularly used to justify further, even bloodier massacres in the form of wars. In passing, we realized that the US narrative on 9/11 could not possibly be true. The findings of this series can be summarized in one sentence: *“The powerful of this world are capable of using any means to achieve their goals - any!”*. This series is therefore a perfectly suitable introduction to an article about a genocide carried out in public, supported or even considered necessary by almost all Western mass media.

Israel - from victim to perpetrator to victim - a back and forth for 80 years (Series)

Only in November did we take on Israel and publish a five-part series on the Israel complex between November 5, 2023 and December 29, 2023 as follows:

In [Part 1](#) (1914-1948) of our series on the history of Israel, we shed light on the period leading up to the founding of the state. A phase of illegal and legal land seizure, as a result of which the State of Israel was proclaimed unilaterally, in contradiction to UN Resolution 181 and against the will of the Arab states. The result was war from day one.

[Part 2](#) (1948-1956) ended with the Suez Crisis. As a result of this second war, Great Britain lost its dominant position in the Middle East. Since then, Israel has aligned itself with the US on all issues. Another result was the stationing of UN troops on the border between Israel and Egypt.

In addition to the 6-Day War and the Yom Kippur War, [Part 3](#) (1956-1973) dealt with a topic that receives little geopolitical attention when it comes to Israel - Israel's water strategy. This is surprising, to say the least, as Israel is also extremely consistent in its approach to this issue, regardless of the interests of its neighboring states.

Part 4 shed light on the 1982 Lebanon War, a war that Israel waged outside its territory with the aim of destroying the Palestinian PLO. A Palestinian liberation organization whose armed arm had been expelled from the West Bank to Jordan by Israel in the preceding Yom Kippur War and then to Lebanon by the Jordanian state after the attempted violent enforcement of political demands in Jordan.

Part 5 covers the period from 1993 to the present. We looked at the Oslo Accords of that year, as a result of which the PLO disappeared into insignificance and Hamas became increasingly important for the Palestinians.

Dealing with the history of Israel and the massacres was an eye-opening experience not only for our readers, but also for myself. Nevertheless, it was clear to me that it would not be easy to change the way the average person sees the world, which I had also been fed for decades by various agitators and in a wide variety of ways, because most people are not skeptics and simply cannot muster the 200 hours or so it takes to expose the fairy tale as a nightmare; why should they, when the fairy tale feels so much more comfortable and does not rob you of your sleep.

Facts and Terminology

A genocide is Being Purchased

We are touching a hot iron here and even the disclosure of the facts means nothing less than a frontal attack against a group that is so rich and powerful that they can (co-) determine presidential elections([Miriam Adelson](#)) and manage not only to commit genocide against women and children in public, but also to present themselves as the victims and get the media to report positively on this monstrous behavior. This is the first time in human history that a genocide has been called a war.

In this extensive article, we only formulate our opinions after we have laid a foundation of facts that cannot be undermined even with all the money in the world.

Zionism is not a religion, but a movement that resorts to criminal means

Zionism and Judaism must be differentiated. [Zionism is a movement](#), not a religion. Its goal is, in a first step, the establishment, justification and preservation of a Jewish nation state in Palestine and, in a second step, the establishment of

Greater Israel. Zionism therefore pursues political and not religious goals. This differentiation is essential and is deliberately concealed by Zionists, Western politicians and the media.

The Zionists deliberately mix up the terms “Zionism” and “Judaism” and use Judaism as a shield for their political intentions, which they realize by criminal means. As soon as criticism of the criminal actions of the Zionists arises, their critics are labeled as anti-Semites, not only by the Zionists, but by practically all Western politicians and media.

As a footnote: Semites are not only the Jews, but a whole group of peoples, including the Arabs, the Ethiopians, the Eritreans, the Maltese, the Assyrians and many more. So an anti-Semite hates not only the Jews, but all these peoples. Another indication of how carelessly language and the meaning of terms are handled.

Non-Jewish Zionists Control American Politics

There are many Zionists who are not Jewish. There are no figures, but estimates are passed around that say that 50% of all Zionists are not Jewish. The Zionists will of course dismiss this as a conspiracy theory. So let's take a look at where money and power meet in the United States, in the current US government. In addition to the well-known large donation from Adelson to Trump, entire hordes of American politicians are bought *in bulk*, thus speaking and voting in the interests of Israel. In the current 119th US Congress (532 members), only 32 Jews are represented (6%), yet the American Congress, which consists of 87% Christians, has been voting staunchly Zionist since 1948 (figures: [Pew Research](#)).

To achieve a majority in Congress requires 50% plus 1 vote (266+1); thus at least 235 non-Jews together with 32 Jews determine the Zionist policy of the United States, which brings the non-Jewish share of Zionists in the US Congress to a whopping 88%.

Zionism: Profitable for American Zionist Politicians

These members can be described as Christian Zionists, e.g. Lindsey Graham, Ted Cruz, Marco Rubio, Mike Johnson, Mike Huckabee and many more. The American Israel Public Affairs Committee (AIPAC) plays an important role in promoting bipartisan support. AIPAC is the only foreign-controlled lobbying organization in the US that does not have to comply with the *foreign agent act*.

Politicians such as Graham, Rubio and Johnson have received sizable campaign contributions from pro-Israel donors (AIPAC), averaging \$125,000 for pro-Israel lawmakers compared to \$18,000 for those more supportive of Palestine. The Gaza genocide is thus very profitable for their political supporters in the US. On the numbers: [The Guardian](#).

Goal of the Zionists: Greater Israel

From Conspiracy Theory to Fact

The goal of the Zionists is much grander than the present Israel. The goal is the creation of Greater Israel. Until recently, anyone who spoke of this project was dismissed as a conspiracy theorist. Today, however, the Zionists speak openly about their plans.

For example, [Bezalel Smotrich](#), the Israeli finance minister in October 2024:

"I want a Jewish state that includes Jordan, Saudi Arabia, Egypt, Iraq, Syria and Lebanon."

Now at least the cat is out of the bag.

There are countless different maps, which show different variants, but basically the map shows the following picture:

Source - Islam21.com

The following countries should therefore dress warmly: Egypt, Jordan, Saudi Arabia, Iraq, Syria and Lebanon.

The Israeli slogan “*From the River to the Sea*” is a deliberate concealment of the actual goal: for years it was insinuated that the Israelis' territorial claims would extend from the Jordan (‘river’) to the Mediterranean (“sea”): However, they extend from the Nile to the Euphrates.

Cyprus in danger?

There are other maps circulating on the internet that depict the Greater Israel to be established on an even larger scale, such as a map published by the Turkish news agency on October 10, 2024.

On this map, Greater Israel also includes parts of Turkey and Cyprus. I am publishing this map for one reason: for some time now, large areas of Cyprus have been bought by Israelis - they want a new, second Israel. The same thing happened in Palestine before the state of Israel was founded. Cypriot citizens and politicians are therefore not worried for no reason. As early as the late 19th century, Cyprus was suggested as a possible [temporary solution](#) for the settlement of Jewish refugees - as a stepping stone to Israel. Since the outbreak of the Israel-Iran war, thousands of Israelis have flocked to Cyprus despite the travel ban.

On X you can find countless warnings from Palestinians to the Cypriot population, such as this one:

Criticism of the colonization of Cyprus is naturally dismissed by the Israelis as anti-Semitism. As a Cypriot, I would be worried.

The Genocide in Words and Images

For many people, the crimes are not even visually present. What you can't see doesn't exist. However, the evidence is easy to find, especially on X, but not in the traditional media.

I spent two days looking at atrocities in the course of my research. The price was more than a week of sleepless nights. It is not my aim to give our readers sleepless nights, but to give them the energy and the arguments to stand up.

That is why we are showing footage here, which should be evidence enough to prove the genocide without causing insomnia.

It is very well possible that some of the material presented here will not longer be available at the time of your reading since it does not show a world, which governments want you to see. In such a case, the links will not work anymore.

Many Jews Oppose Zionism and Israel

Media Accuse Every Critic of Genocide of Anti-Semitism

Hand in hand with the justification of the genocide committed in public, the Western media are fighting tooth and nail to prevent their mendacious conflation of Zionism and Judaism from being exposed. This is the case when Jews themselves point out these lies - and this is exactly what is happening now.

If you search for “*Rabbis against Genocide*” or “*Rabbis against Zionism*” on X, you will find what you are looking for. The big media are losing control of their mendacious narrative. It should come as no surprise that the Neue Zürcher Zeitung (NZZ) - one of the most influential promoters of genocide in the German-speaking world - accuses [Grok](#), the AI tool of Elon Musk's X, of anti-Semitism: “[Elon Musk's chatbot makes anti-Semitic remarks](#)”. The media's fear of losing their “anti-Semitism narrative” is understandable, because if this narrative falls, they will see the world for what they are: Genocidal psychopaths.

Representative of the countless sources on the internet, we present two statements, one from an orthodox rabbi and one from a famous Israeli journalist.

Rabbi Goldberg, Short and to the Point

“Israel is not a Jewish state.

You can't just take an ancient religious, collective, and transform it into a nationality because it convenient for the Zionists.

Yes, Jews live in Israel, and we pray for their safety, but that doesn't make Israel the country of all Jews of all nationalities. Combining Judaism and Zionism is the key in creating more antisemitism.”

RABBI GOLDBERGER – 8 JULY 2025

Gideon Levy, Journalist

Thousands of Jews, whether orthodox or not, are resisting Israel's policies and making clear statements against Zionism. They are hardly heard - except on X - and I don't even want to imagine the danger these courageous people put themselves in - they have my greatest admiration. I have no idea how many Jews disagree with Israel's disgusting policies and are condemned to silence because of the prevalent social structure.

Why were the Nazi Butchers Hated - Because they were Christians?

It is a fact that the Nazis and their helpers slaughtered six million Jews and over 15 million Soviet civilians. Is it legitimate to hate these psychopaths? - I believe so.

“The biggest lie of this genocide: that opponents of the genocide are anti-Semites.”

Do you hate these criminals because they were genocidal Nazis or for their religion? One can assume that practically 100% of the perpetrators were Christians. I have never heard of Christians being hated as a result of the Holocaust. So why should we hate the Jews when Zionist Israelis slaughter Palestinians just because many of the perpetrators are Jews? Once you realize this logic, you remove the narrative from the psychopaths - perpetrators and defenders of these crimes - that critics of genocide are anti-Semites.

An Oppressive State - led by Psychopaths - Supported by its own People

Israel was proclaimed unilaterally in violation of the famous [UN Resolution 181](#), which called for a two-state solution. The State of Israel is therefore an entity without a legal basis and thus has no “legal basis for existence” but merely a “right to exist”, which was brought about by the majority of UN members under considerable pressure from the US and Great Britain. One would therefore think that a state that stands on such shaky legal foundations would make all the more effort to respect the rights of its inhabitants and neighbors. However, the realities prove the opposite.

Since 1948, the state of Israel has increasingly behaved like Nazi Germany. It has been systematically decimating and eliminating the Arab population for almost 80 years, leading an apartheid regime and seems to have taken October 7, 2023 as an opportunity to initiate the “final solution” to the Palestinian problem. Never before in the history of mankind has a people behaved so appallingly in public and at the same time had thechutzpah to portray itself as a victim and present its genocidal behavior as a “right to self-defense”. For the exact factual basis of the statements made here, I refer you to our [Israel series](#).

Golda Meir - Israeli Prime Minister 1969-1974 - looked more grandmotherly than she was.

The Western Media as Complicit in Genocide

Accomplices are punished like the main offenders

It is obvious that practically all commercially run media in the West twist concepts in the worst possible way, rape history and, as paid henchmen, not only promote genocide, but contribute to the genocide, which they make accomplices.

Criminal law distinguishes between aiding and abetting and co-perpetration, whereby the contribution to the offence is subordinate in the case of aiding and abetting, but must be causal to the realization of the offence in the case of co-perpetration. This contribution does not require equivalence, but relevance in the commission of the offense.

If the media reported objectively and factually correctly, this reporting would make the genocide impossible, as the populations of the world would force their governments to break off all contact with Israel and thus Israel would be unable to commit these crimes due to a lack of weapons and money.

The Western media are therefore guilty of complicity. Accomplices are punished in the same way as the main perpetrators. There is no mitigation of punishment due to this form of participation, as genocide can only be carried out with the participation of the media.

Nuremberg precedent: Julius Streicher

This view is by no means far-fetched. The editor-in-chief of the National Socialist diatribe “Der Stürmer”, Julius Streicher, was hanged with other major war criminals in Nuremberg in 1946. The ladies and gentlemen of the media concerned should do some soul-searching.

In the following, we analyze the practices and statements of two media companies from German-speaking countries, representative of almost all media companies in the West, although, in contrast to Europe, critical voices are becoming louder in the US.

ARD, the first German state television channel, should actually know better after the German crimes a few decades ago, but today it stands out for its downright diabolical behavior. We also mention the Swiss weekly *Weltwoche*, as it likes to present itself as a Robin Hood-like savior of the truth and completely fails in the biggest crime of the still young 21st century, betraying not only the victims of the genocide but also its readership.

German State Television on the Trail of Dr. Goebbels of All People

10 days after the start of the final solution to the Palestinian problem, the editor-in-chief of the First German Television (ARD), Oliver Köhr, distributed a glossary on reporting on the Middle East conflict among his staff. This document was intended for internal use and found its way into the public domain, probably through an employee who was disgusted by this Goebbelsian approach. This document gives

the reader an insight into the perfidy with which the management of the first German television station filled its own employees with pseudo-scientific half-truths and made them justify a genocide. We reported on this in “[ARD glossary justifies genocide - Dr. Goebbels would be proud](#)”.

Schweizerische Weltwoche is also a Collaborator

The Swiss weekly magazine Weltwoche, whose publisher and editor-in-chief likes to present himself as a critical intellectual and Robin Hood of truth who questions everything, does not question anything when it comes to genocide, but reliably promotes the Zionist line.

In his daily show “Weltwoche Daily”, Roger Köppel said the following on December 6, 2024 (shortened quote - full-length video):

"Amnesty International accuses Israel of genocide. For once, stop calling everything genocide. [...] I know of one genocide or attempted genocide. That is the genocide of the Jews. [...] Now I say something about the situation in Gaza. That is not genocide. If the Israelis want to commit genocide, they could have it easier. Then they would simply have to lay carpets of bombs over the Gaza Strip. [...] The word "genocide" has become the weapon of these woke moralists, these crusaders, these woken - even right-wingers - who juggle it around and thus invalidate the meaning of the word. There are a lot of Palestinians in Jordan - they are not being murdered."

ROGER KÖPPEL - PUBLISHER AND EDITOR-IN-CHIEF WELTWOCH
- WELTWOCH DAILY - DECEMBER 6, 2024

These statements do not meet minimum journalistic, human or intellectual requirements:

- Genocide is a crime and a glance at the UN website or the ICC's deliberations would have been enough to subsume Israel's actions under the criminal offense of genocide, even as a legal layman. You don't have to be an intellectual to do this, you just need common sense and 10 minutes of your time.
- He also denies facts: He claims, for example, that Israel could "commit genocide" by laying carpets of bombs over Gaza. [But that is exactly what Israel is doing.](#)

- Why Köppel even bothers to deny the genocide he promotes is strange: In contrast to him, the Israelis do not deny the genocide at all, but believe they have a right to do so and naturally feel victimized by this “work” - see quote from Golda Meir.
- When he claims that there was only one genocide - the one committed by the Germans against the Jews - he is not only speaking like a typical Israeli, “we are the victims, the only victims!” (see Gideon Levy above), but he also snubs the people who had to endure the greatest genocide: in his Zionist fervor, the self-declared Russia expert has probably missed the fact that the Nazis [slaughtered](#) between [15.9 and 17.4 million civilians](#) in the Soviet Union. Köppel does not even mention the largest genocide in human history in terms of numbers.
- When Köppel states that there are a lot of Palestinians in Jordan, that are not being murdered, I do not know what to read into this statement: That the Palestinians should move out of their homeland, if they want to survive?
- Köppel goes on to justify the genocide by linking President Putin's actions in Ukraine with those of Netanyahu in Gaza. He fails to mention that President Putin was not wanted by the ICC for genocide, but - together with Maria Lvova-Belova, the Russian Commissioner for Children's Rights - for the alleged deportation of children to Russia. An accusation that has long since proven to be untenable and is no longer even claimed by the Ukrainians. He makes this cynical conflation against his better judgment, as Köppel conducted an [interview](#) with Ms. Lvova-Belova on precisely this topic in Moscow in May 2023.

Weltwoche completely lost its moral compass a few days ago when it published the article “[The greatest enemies of the Jews are - Jews](#)” on July 4, 2025, in which it attacks those Jews who oppose the genocide. The author - one David Klein - calls Jews who oppose the genocide in Israel «Duldungsjuden» (en. “*Jews of Toleration*”).

The editors of Weltwoche were demonstrably aware that this article was of the worst possible nature, as the comment function was switched off for the first time on “Weltwoche Online”. This article was a service to the Zionists and not a contribution on which they wanted to hear the opinion of paying readers. As Weltwoche readers were unable to submit comments to Weltwoche, some readers sent comments to us and informed us that inquiries to the editors as to why the comment function had been switched off remained unanswered. Some readers compared the article to the “Stürmer”: “Duldungsjuden”? - Inexcusable!

How can a Family Man Justify Genocide of Children?

As a father, I cannot comprehend condoning such an act under any circumstances. Obviously, people who endorse - or even carry out - genocide can activate a mechanism in their conscience that is able to distinguish between their own children and the children of “sub-humans”. There are certainly historical examples.

Rudolf Höss shows himself in his villa in Auschwitz as a loving father of five children (1943) - Source: [Geo-Wissen](#)

Why the Media Do This - Money Rules the World

In the case of bought politicians in the US, the role of money is evident and provable with hard facts, see above. The “services” of politicians are bought in plain sight.

The media in the West regularly talk about being independent. For me, the perverse reporting on the genocide is proof to the contrary: Most of the media are controlled by their advertisers and unknown backers. I cannot give you any information about the nature of this influence, because [Forum Geopolitica does not accept advertising money](#). Otherwise we would not be able to do our work.

However, true independence comes at a price. If you have to maintain villas and vacation homes, accumulate gigantic travel expenses, because luxury is the order of the day, as a publisher you should have private funds at your disposal that make such a lifestyle sustainable regardless of advertising income, otherwise you will degenerate into what you don't want to degenerate into: a store-bought accomplice.

Conclusion

What conclusions should one come to after seeing so much evil, deceitfulness and bought people? - It would be dishonest and naive to choose words of reconciliation and hope that the guilty will change, because they will not.

If one were to apply the standards of the statute of the Nuremberg Tribunal and its judgment of 1946, then the following institutions and their leading personnel would have to reckon with the maximum penalty. The main perpetrators are the Israeli government, the secret services and the military, those directly involved in the genocide. In addition to the politicians throughout the West, who made this bloodbath politically, economically and militarily feasible in the first place, the media should be emphasized as accomplices. Without their deliberately false, manipulating reporting, the populations of the West would never have been prepared to tolerate these crimes and thus support them.

In contrast to the Holocaust, this genocide is being committed in public and supported and promoted by Western politicians and media. Western society is thus so degenerate that it will probably not be able to muster the energy for a cleansing process such as a tribunal.

I simply deny states without any understanding of history, as well as the organizations and companies concerned, the moral right to exist. If humanity is unable to put a stop to such monstrous creatures and organizations, the question

arises as to the viability of what we call civilization: Without a minimum level of humanity and justice, a social system cannot and should not survive.

Civilization also means that those directly affected by genocide have the right to use any means to defend themselves against the perpetrators. It means no less that the media and their exponents who support genocide in whatever form should be banned through social ostracism. They should die alone, without ever being heard again, in the dungeon of loneliness.
